

Minutes of Meeting

Meeting of pharmacovigilance committee was convened in college council hall, GMC, Surat on 10th April 2017 on 3:30 PM in the chairmanship of Dean, GMC, Surat.

In this meeting Dr Kantharia Welcomed the members of committee. He gave brief idea regarding recently reported ADR to pharmacovigilance committee.

Dr Parahuman Chaudhari presented the case report on suspected adverse drug reaction "Patent ductus arteriosus" due to clozapine and Trifluoperazine. He further explained aetiology and corrective measures for PDA.

This session was followed by interactive discussion with participants in form of question answer as well as suggestions.

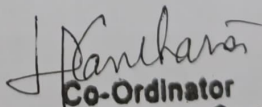

Dr Priyank Modi suggested that Doppler study of foetal heart to be made mandatory so that future ADR can be prevented.

Dr Ila Upadhyay suggested monthly reporting of ADR to be made mandatory for each department to improve reporting of ADR. She further suggested even if NO ADR report is there in a month, NIL report should also be submitted.

Dr Ila Upadhyay made a query that drug induced nausea /vomiting should be considered as ADR. All members agreed that it should be.

Dr Anand Chaudhari suggested to fix a date for ADR form submission, twice or thrice in a month.

Dean Sir thanked all members and inspired everyone to participate in pharmacovigilance activity with enthusiasm.
